Programe:10

```java
public class Whileloop
{
        public static void main(String args[])
        {
                int i=1;

                while(i<=10)
                {
                        System.out.println(i);

                        i++;
                }
        }
}
```
