Program-2

```java
import java.util.Scanner;
public class ArrayReversScanner {
    public static void main(String[] args) {
        int i,limit;
        Scanner read = new Scanner(System.in);
        System.out.print("Enter the limit:");
        limit = read.nextInt();
        int[] products = new int[limit];
        System.out.println("Enter array elements:");
        for(i=0; i < limit; i++){
            products[i] = read.nextInt();
        }
        System.out.println("\nArray elements in reverse order:");
        System.out.println("_____");
        for (i=limit-1; i >= 0; i--)
        {
            System.out.println(products[i]);
        }
    }
}
```
