Program:9

```java
public class Size
{
  public static void main(String[] args)
  {

    int number = 44;
    String size;

    // switch statement to check size
    switch (number) {

      case 29:
        size = "Small";
        break;

      case 42:
        size = "Medium";
        break;

      // match the value of week
      case 44:
        size = "Large";
        break;

      case 48:
        size = "Extra Large";
```

```java
        break;

    default:
      size = "Unknown";
      break;

  }
  System.out.println("Size: " + size);
 }
}
```
